This combined statement of receipts and expenditures for the fiscal year ended June 30, 1950, consists of four parts as follows:

Part I - *Fiscal Year 1950 Summaries*, relating to receipts and expenditures.

Part II - *Details of Receipts, fiscal year 1950*, showing more detailed information regarding receipts classified according to (a) sources; (b) organization units; and (c) states, districts, and ports of collection.

Part III - *Details of Appropriations, Expenditures, and Balances, fiscal year 1950*, showing according to each separate head of appropriation: (a) undisbursed balances brought forward from the preceding fiscal year; (b) appropriations set up during the fiscal year; (c) transfers between appropriations pursuant to authority of law; (d) total or net appropriations; (e) net disbursements (checks-issued basis); (f) amounts transferred to Payment of Certified Claims Account and to the surplus fund (see explanation on page 3); and (g) undisbursed balances at the end of the fiscal year. This presentation differs from that of previous years as explained in the Preface immediately preceding Part III of this report. The appropriation accounts are arranged in these

tables according to general accounts, special accounts, and trust accounts, respectively. A separate table is included for the public debt.

With one exception to be noted, all of the figures are based upon warrants issued by the Secretary of the Treasury and countersigned by the Comptroller General of the United States, pursuant to Title 31, sec. 147, of the United States Code. The amounts shown in this report for disbursements are on the basis of checks drawn by disbursing officers on the Treasurer of the United States, and in addition include net warrant expenditures such as settlement warrants, transfer and counter warrants, adjustments (net), and repayment warrants. A more detailed explanation appears under the caption "Bases of Figures Included in This Report."

Part IV - *Informational Tables*, consisting of a series of special statements relating to the accountability for money appropriated, and financial information regarding foreign aid and relief activities, the social security program, the public debt, corporations and certain other business type activities of the United States Government, and other activities.

REORGANIZATION OF GOVERNMENT DEPARTMENTS AND AGENCIES

On page 5 appears a chart showing the creation, transfer and consolidation of executive agencies and functions effected during the fiscal year 1950. Such changes were effected under general authority vested in the President by the constitution and statutes of the United States, as President of the United States, and as Commander-in-Chief of the Army and Navy and by plans

of the President effected under the Reorganization Act of 1949, approved June 20, 1949 (63 Stat. 203-207). The authority for each reorganization is shown in the chart.

Reorganizations effected in previous years are exhibited in the Combined Statements of Receipts and Expenditures relating to such years.

BASES OF FIGURES INCLUDED IN THIS REPORT

RECEIPTS

Section 305 of the Revised Statutes (U.S. Code, title 31, sec. 147) provides that receipts for all moneys received by the Treasurer of the United States shall be endorsed upon warrants signed by the Secretary of the Treasury, without which warrants, so signed, no acknowledgement for money received into the Public Treasury shall be valid.

The receipts of the United States Government as published in this report are based upon warrants issued by the Secretary of the Treasury and represent the formal covering into the Treasury of the public moneys deposited in Treasury offices and Government depositaries during the fiscal year ended June 30, 1950.

EXPENDITURES

The expenditures in this report are exhibited on the basis of checks issued. There is another basis on which the Treasury Department publishes receipts and expenditures of the Government which is known as the daily Treasury statement basis. While expenditures are not exhibited in this report on such basis, it is explained herein as a matter of general information.

Checks-issued basis.—The expenditures in this report are shown on the basis of checks issued and include net warrant expenditures such as settlement warrants, transfer and counter warrant adjustments (net), and repayment warrants. In other words, the expenditures on the basis of checks issued as exhibited in this report represent all the checks drawn upon the Treasurer of the United States during the fiscal year 1950 in payment of Government obligations. The detailed expenditures on the basis of checks issued are shown in the fifth money column of this report beginning on page 134.

Daily Treasury statement basis.—There is another basis on which the Treasury Department publishes the receipts and expenditures of the Government. This basis is presented in the figures of the Daily Statements of the United States Treasury. With the exception of expenditures made through the Division of Disbursement Treasury Department, which are on a check issued basis, such figures represent the deposits and checks which are cleared each day through the Treasurer's accounts at Washington. They are compiled from latest daily transcripts of accounts received by the Treasurer of the United States from Federal Reserve banks and other Government depositaries. Occasionally, however, certain important transactions, such as income tax receipts during heavy collection periods, are reflected in the daily Treasury statement on the basis of telegraphic reports from Federal Reserve banks confirmed subsequently in the related daily transcripts when received. With respect

EXPENDITURES—Continued

to expenditures made through the Division of Disbursements, Treasury Department, beginning with the fiscal year 1948, expenditures of the several departments and establishments serviced by that Division are reported through the use of teletype facilities in the daily Treasury statement as of the day on which the checks are issued in payment of obligations. A clearing account is provided to take care of outstanding checks. The daily Treasury statement, therefore, is a current report compiled from the latest available information of actual receipts and expenditures. By reason of the promptness with which this information is compiled and made public it is generally regarded as reflecting for a given period the financial operations of the Government, as far as they are ascertainable from day to day.

On account of the distance of some of the Federal Reserve banks and other depositories from the United States Treasury at Washington, the reports from all depositories covering a particular day's transactions cannot, under the existing procedure, be received and assembled in the Treasury as of the date on which the transactions take place in the depositories without delaying for several days the publication of the daily Treasury statement. It is necessary, therefore, in order to determine final figures relating to total receipts and expenditures for any given month or fiscal year, to take into consideration the accounts of Government depositories covering the transactions for the last few days of the month or fiscal year concerned which have not been received at the

Treasury until the succeeding fiscal year, and to eliminate those receipts and expenditures which actually relate to the preceding fiscal year. After taking into consideration these reports, the revised figures reflect the condition of the Treasury on the basis of actual transactions occurring in all Government depositories during the period under review. Although there is not published a daily Treasury statement containing revised figures on this basis, it is known as the "basis of daily Treasury statements, revised."

It is not advisable to delay the publication of the daily Treasury statement in order to include the later reports, as the difference between the preliminary and the final figures is not material. In view of the delay in the receipt of final reports from all depositories, the revised figures are used principally for accounting purposes, since they furnish a true general-fund balance for use in annual reports.

Since the warrant accounts on the books of the Secretary of the Treasury (Division of Bookkeeping and Warrants) are kept open after the close of the year in order to take care of all moneys reaching Government depositories during that year, the receipts on a warrant basis are the same as those on the so-called "basis of daily Treasury statements, revised." In other words, they represent the moneys reaching Government depositories during a particular fiscal year without regard to the time or the dates on which such deposits are cleared through the Treasurer's accounts at Washington.

APPROPRIATIONS

Article I (sec. 9) of the Constitution of the United States provides that no money shall be withdrawn from the Treasury but in consequence of appropriations made by law. The appropriations exhibited in this report are the amounts which, by law, Congress authorized to be established upon the books of the Treasury during the fiscal year 1950. The figures necessarily differ somewhat from the appropriations exhibited in the annual "Digest of Appropriations," compiled by the Treasury Department, the "Statement of Appropriations" for the Eighty First Congress, Second Session, Prepared under the direction of the Committees on Appropriations of the Senate and House of Representatives, and the comparative statement of appropriations for the fiscal year 1950, contained in the annual "Budget of the United States," for several reasons as may be observed by a study of the "Accountability Statement of Appropriations by Acts of Congress," appearing on pages 574 to 579 of this report. These differences are due principally to (1) the difference in the time at which the different reports are compiled, and (2) special provisions and limitations enacted by Congress in appropriation acts in regard to the availability of the appropriations. For instance, the three documents mentioned above are compiled about the beginning of the fiscal year for which the appropriations are made, and, therefore, include estimated amounts to cover permanent and indefinite appropriations, whereas the Combined Statement of Receipts, Expenditures and Balances of the United States Government is compiled after the close of the fiscal year, and the figures in this report under such appropriations are actual. As to the time of the availability

of appropriations, it will be noted by reference to Part IV, Table I that of the total appropriations provided in the annual appropriation acts for fiscal year 1950 aggregating \$34,335,010,322.75 the sum of \$313,259,000.00 was made immediately available by Congress upon the dates of approval of the several acts, and therefore was established upon the books of the Treasury in the fiscal year 1949 instead of 1950. In like manner, by the terms of the annual appropriation acts for 1951 aggregating \$33,979,690,101.00, the sum of \$306,971,378.00 was made immediately available upon the passage of such acts, and, established upon the books of the Treasury during the fiscal year 1950. Other appropriations established upon the books of the Treasury during the fiscal year 1950 consist of amounts contained in the Third Deficiency Appropriation Act, 1949, approved October 10, 1949, \$155,375,353.61; Supplemental Appropriation Act, 1950, approved October 14, 1949, \$73,263,873.48; Second Supplemental Appropriation Act, 1950, approved October 28, 1949, \$1,032,406,038.45; Urgent Deficiency Appropriation Act, 1950, approved March 27, 1950, \$739,653,500.00; The Deficiency Appropriation Act, 1950, approved June 29, 1950, \$520,919,703.54; and miscellaneous public acts, public resolutions and private relief acts amounting to \$6,887,101.36. Other differences in appropriation figures are attributable to the fact that certain appropriations provided by Congress in the annual and deficiency appropriation acts are not payable from the general revenues of the Treasury, but are provided for from postal revenues and from revenues in special accounts hereinafter described.

PAYMENT OF CERTIFIED CLAIMS ACCOUNT

Act of July 6, 1949 (63 Stat. 407)

The Act of July 6, 1949 (Public Law 159, 81st Congress), amended the provisions of law relating to the surplus fund and certified claims. Under the amendment, the unexpended balances of lapsed appropriations, that is, those which have remained on the books for two fiscal years following the fiscal year for which appropriated, are to be transferred on July 1, of each year to a consolidated appropriation account known as "Payment of certified claims."

The amounts thus transferred to the consolidated appropriation account, "Payment of certified claims," remain available until expended for the payment of claims, within the limit of and chargeable to the respective balances of any lapsed appropriations, which may be

certified by the Comptroller General of the United States to be lawfully due. On July 1 of each year, all funds in the consolidated appropriation account, "Payment of certified claims," certified by the Comptroller General of the United States as not required for the payment of claims thereunder are to be carried to the surplus fund of the Treasury.

The amounts of each appropriation carried to the "Payment of certified claims" account are shown in the sixth money column of this report. Also included in this column, with appropriate footnotes, are items such as rescissions of appropriations by the Congress and amounts carried directly to the surplus fund of the Treasury.

SURPLUS FUND

Act June 20, 1874 (18 Stat. 110)

The term "Surplus Fund of the Treasury," as used by the Congress in appropriation acts, and in the act of June 20, 1874, and by the Treasury Department does not represent a physical fund consisting of surplus cash or other assets as the term would ordinarily imply in accounting terminology. The term as herein used has no relation to surplus income. It is merely an expression to describe the writing off of the books of certain appropriations which have been repealed, or the unexpended balances of inactive appropriations not required for settlement of accounts.

Appropriations when made by Congress and established upon the books of the Treasury Department do not represent so much income or cash actually set aside in the Treasury for the purposes specified in the appropriation acts. Appropriations are established upon the books of the Treasury simply as record accounts and merely represent the limit to which administrative offices may obligate Government funds during the fiscal years specified in the appropriation acts, and as a general rule are based upon anticipated future tax collections and other receipts. It follows, therefore, that when appropria-

tions, or unexpended balances of appropriations, are carried to what is termed in the law the "surplus fund of the Treasury" it involves simply a matter of writing such appropriations off of the books without increasing the cash in the Treasury or affecting it in any manner. The amounts of appropriations carried to the surplus fund of the Treasury are reflected in the sixth money column of this report and are explained by appropriate footnotes.

In contradistinction, the term "surplus," as used in connection with the receipts and expenditures of the Government, represent the ordinary receipts, i.e., customs duties, internal revenue, and miscellaneous, for a given period in excess of the expenditures chargeable against such receipts for the same period, usually for fiscal year. There is no relation between the two terms described. The excess or surplus of the Government's receipts over its expenditures is not permitted to accumulate in the Treasury from year to year, but is used as promptly as conditions permit to reduce the public debt.

FUND DISTINCTION

The receipts and expenditures included in this report all fall within the General Fund. This arrangement, as indicated on the first page of the "Daily Statement of the United States Treasury," serves to maintain the maximum flexibility in the handling of all moneys placed in the Treasury. Within this fund, however, the Division of Bookkeeping and Warrants maintains a number of accounts, designated as general accounts, special accounts, and trust accounts. Certain receipts are credited to these accounts and certain expenditures are made therefrom, as required by law. All receipts of the Government which go into the general accounts are expended only in accordance with appropriations made by Congress.

The general accounts.—The principal sources of receipts covered into the general accounts are income tax, other internal revenue, and customs duties. Receipts from miscellaneous sources, which are not earmarked for special

or trust accounts, are also covered into the general accounts. Such receipts include the proceeds of Government-owned securities (except those which are applicable to public-debt retirement), sale of surplus and condemned property, Panama Canal tolls, fees of various kinds, fines, penalties, forfeitures, rentals, royalties, reimbursements, immigration head tax, sale of public land, and interest on public deposits.

As already noted, moneys covered into the general accounts may be withdrawn from the Treasury only through appropriations made by Congress. These appropriations are of two general types—annual and permanent. The annual appropriations ordinarily found in the departmental supply bills are voted each year by Congress. They are usually definite or specific as to amounts. They may be obligated only during the fiscal year to which they relate, their unexpended balances remaining on the books

FUND DISTINCTION—Continued

for 2 additional years before being carried into the "surplus fund of the Treasury," or "payment of Certified Claims Account." The permanent appropriations are automatically renewed each fiscal year over a period of time by virtue of permanent legislation, without annual action by Congress. Such appropriations may be either definite or indefinite as to amounts. An example of the latter is the indefinite-permanent appropriation to cover the interest on the public debt. Sometimes Congress makes appropriations which are available until expended, or until the object for which they are made is accomplished. These appropriations are without a definite time limit, and may therefore be called no-year appropriations. They are frequently employed by Congress when providing for the construction of public-works projects.

Special accounts.—The special accounts, often referred to in the law as special funds, are usually credited with certain receipts which may be expended only for specified purposes. These receipts, in other words, are earmarked at the time of their deposit, so that they may not be used for the general expenditures of the Government.

The more important special accounts, other than those applicable to debt retirement, are the reclamation account and Alaska Railroad receipts, under the Department of the Interior, and forest reserve fund under the Department of Agriculture.

There are many other special accounts involving smaller amounts.

In connection with the collection and use of receipts credited to special accounts it will be noted by reference to page 43 and following pages, that ready references are given to the pages on which the appropriations of such receipts may be found. These references will be found especially helpful in cases where Congress has designated in advance the use of receipts from particular sources to several different objects of expenditure on a percentage basis, such as in the case of Federal power receipts (p. 73), forest reserve receipts (p. 85) and Mineral Leasing Act receipts (p. 94).

Trust accounts.—The trust accounts generally represent moneys received by the Government for the benefit of individuals or classes of individuals. Moneys held in trust, being payable to or for the use of beneficiaries only, are not available for general expenditures of the Government. There are several classes of trust accounts, the beneficiaries under which may be either individuals

or groups of individuals. The accounts may represent (a) moneys received directly from or for the benefit of individuals, as in the case of moneys received from foreign Governments or other sources in trust for citizens of the United States or others under the act of February 27, 1896 (U.S.C., title 31, sec. 547); (b) moneys collected as revenues and held in trust, such as the proceeds of sales of Indian lands, which are held as interest-bearing moneys for the benefit of Indian tribes; and (c) proceeds of grants from the General Treasury in pursuance of treaty or other obligations, such as the perpetual trust account created for the Ute Indians under section 5 of the act of June 15, 1880 (21 Stat. p. 204).

Revenues of the municipal government of the District of Columbia and expenditures therefrom, for the purpose of the classification of receipts and expenditures in this report, are regarded as trust accounts. The share of the United States of expenditures on account of the District of Columbia, which is payable "out of any moneys in the Treasury not otherwise appropriated," is charged as an expenditure on general account. In like manner expenditures under annual appropriations for certain trust accounts, such as the civil-service retirement fund, and the Foreign Service retirement fund, are classified under general accounts. Changes in the working balances under these accounts due to variations between credits and charges thereto are stated in connection with expenditures under the caption "Trust accounts."

Special deposit accounts.—Special deposit accounts are in the nature of suspense accounts, established to care for moneys deposited with the Treasurer of the United States for safekeeping, and refunds representing moneys not yet ready to be covered into the general account of the Treasury, or to be returned to the depositors. Such moneys are held temporarily in special deposit accounts subject to administrative or legal determination as to their final disposition.

Working funds.—Under act of June 30, 1932 (47 Stat., p. 417, sec. 601), amending sec. 7, act May 21, 1920 (U.S.C., Title 31, sec. 686) as amended by act of June 26, 1943 (57 Stat. 219), working funds are established by the Secretary of the Treasury, by repay covering warrants, representing amounts advanced by any executive department or independent establishment of the Government to any other department or establishment, for the furnishing of supplies or services.

Notes.—Negative figures are shown in italics.

¹ Amounts refunded by the Government, principally for the overpayment of taxes, are being reported in the daily Treasury statement as deductions from total receipts rather than as expenditures. Such amounts and related data are excluded from this statement and shown in the Treasury Department tabulations page 342 of this report.

² The totals shown above for General and Special Appropriation accounts do not include expenditures which by Congressional authorization are handled as public debt transactions (see note 5). Tables 14 and 15 in Part IV of this report contain the details of such expenditures on a cumulative basis.

³ Represents \$130,922,772.20 carried to surplus fund, pursuant to acts July 12, 1870 (18 Stat. 251, sec. 5), and June 20, 1874 (18 Stat. 110); \$319,648,049.71 by public laws (see table 3, Part IV); \$953,433.21 credit resulting from eliminating refunds by the Government principally for the overpayment of taxes (see note 1); \$5,838,441.71 reestablished from surplus fund act March 3, 1875 (18 Stat. 418, sec. 5); and \$8,379,754.46 adjustment of prior year appropriated receipts treated as surplus.

⁴ See also summary of trust accounts.

⁵ By Congressional authorization, handled as public debt transactions.

⁶ For United States share of divided accounts and Federal annual contributions, see summary of general and special accounts above.

⁷ See also "Government Corporation and Agency Checking Accounts with the Treasurer of the U. S." above.

⁸ Includes \$1,371,201,790.21 representing General and Special funds transferred to trust fund receipts and appropriated.

⁹ Includes expenditures for investments and benefits from funds referred to in footnote 8.

¹⁰ Represents \$3,094,560.97 carried to surplus fund, acts July 12, 1870 (18 Stat. 251, sec. 5), and June 20, 1874 (18 Stat. 110); \$955,873.79 adjustment of prior year appropriated receipts treated as surplus, and \$47.34 reestablished from surplus fund act March 3, 1875 (18 Stat. 418, sec. 5).

¹¹ This amount does not represent total expenditures for the reason that it includes both the transfer of funds referred to in footnote 8 and the expenditures made from such funds as referred to in footnote 9. The transfer reflected as expenditures under "General and Special" is offset by a corresponding credit in receipts under "Trust Accounts."

¹² The undisbursed balances, June 30, 1949 as shown in the 1949 report has been adjusted by \$68,544,187.83, "Special Deposit Account, Tax Withholdings" now reflected in receipt tables; \$19,124,490.10 balance in "Rural Electrification Administration" collection account now reflected in receipt tables; \$2,060,663.91 balance in "Farmers' Home Administration" collection account now reflected in receipt tables, and \$3,859,633.83 balance in checking account "Veterans' Canteen Service" not included in the 1949 report of "Special Deposit Accounts (net) Other."

PREFACE

In this report for the fiscal year 1950, the manner in which the details of appropriations, expenditures, and balances are exhibited is modified by the consolidation of amounts previously shown in separate columns for unexpended balances, and the omission of columns showing the analysis of warrant-issued expenditures. The amounts of unexpended balances as of the beginning and end of the fiscal year for previous years were reflected in separate columns to show (1) on books of the Treasury and (2) to credit of disbursing officers, whereas in this report these balances have been consolidated into one column and shown under the caption "Undisbursed balances." The columns reflecting the analyses of the several types of warrants issued expenditures which were

exhibited in previous reports, viz.: settlement warrants, transfer and counter adjustments (net) and repayments to appropriations, are omitted from this report as such transactions are netted in the column captioned "Net disbursements checks-issued basis."

A change also has been made in the manner of reporting advances of funds from appropriation accounts to working fund accounts. In the reports for previous years such accounts were reflected under the agencies to which the funds were advanced, whereas, in this report the undisbursed balances and transactions pertaining to such funds are shown under the appropriation account from which the funds were originally derived.

Note.—"Accounts of Advances" are accounting funds established as a means of handling Department of the Army and Department of the Navy appropriations pursuant to provisions contained in acts of June 5, 1920 (41 Stat. 975), and June 19, 1878 (20 Stat. 167). Advances of funds are made to disbursing officers and agents of the Department of the Army and the Department of the Navy under these funds, not to exceed the total appropriations of the Department of the Army and the Department of the Navy, the amounts so advanced to be used exclusively to pay current obligations. The amounts advanced are subsequently charged to the proper appropriations and credited to "Accounts of Advances" by transfer and counter warrants prepared by Department of the Army and Department of the Navy, subject to audit and settlement by the General Accounting Office, the said charge, however, to each appropriation account is limited to the amount appropriated.

⁵ Treasury bills are non-interest-bearing and are sold on a discount basis on competitive bids for each issue. The average sale price of these series gives an approximate yield on a bank discount basis (360 days a year) as indicated opposite each issue of bills. This yield differs slightly from the yield on a true discount basis (365 days a year) which is shown in the summary of table.
⁶ Redeemable, at par and accrued interest, to date of payment, at any time upon the death of the owner at the option of the duly constituted representative of the deceased owner's estate, provided entire proceeds of redemption are applied to payments of the Federal estate taxes due from deceased owner's estate.

TAX EXEMPTIONS:
^a Any income derived from Treasury bills, whether interest or gain from their sale or other disposition does not have any exemption, as such, and loss from the sale or other disposition of any such bills does not have any special treatment, as such, under the Internal Revenue Code or laws amendatory or supplementary thereto. The bills are subject to estate, inheritance, gift, or other excise taxes whether Federal or State, but are exempt from all taxation, now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority. For purposes of taxation the amount of discount at which the bills are originally sold by the United States is to be considered to be interest.
^b Income derived from these securities is subject to all taxes now or hereafter imposed under the Internal Revenue Code or laws amendatory or supplementary thereto. The securities are subject to estate, inheritance, gift or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter

imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority. The following is applicable to savings bonds only: For the purposes of taxation any increment in value of savings bonds represented by the difference between the price paid and the redemption value received (whether at or before maturity) shall be considered as interest.
Attention is invited to Treasury Decision 4550 ruling that bonds, notes, bills, and certificates of indebtedness of the Federal Government or its agencies, and the interest thereon, are not exempt from the gift tax.
^c Exempt, both as to principal and interest, from all taxation now or hereafter imposed by the United States, any State, or any of the possessions of the United States, or by any local taxing authority, except (a) estate or inheritance taxes, and (b) graduated additional income taxes, commonly known as surtaxes, and excess profits and war profits taxes, now or hereafter imposed by the United States, upon the income or profits of individuals, partnerships, associations, or corporations. The interest on an amount of bonds authorized by the act approved September 24, 1917, as amended, the principal of which does not exceed in the aggregate \$5,000 owned by any individual, partnership, association, or corporation, shall be exempt from the taxes provided for in clause (b) above. The following is applicable to savings bonds only: For the purposes of determining taxes and tax exemptions the increment in value of savings bonds represented by the difference between the price paid and the redemption value received (whether at or before maturity) shall be considered as interest.
^d Exempt from the payment of all taxes or duties of the United States, as well as from all taxation in any form by or under State, municipal, or local authority. (The Supreme Court has held that this exemption does not extend to estate or inheritance taxes imposed by Federal or State authority.)
^e Interest on these bonds is subject to all taxes now or hereafter imposed under the Internal Revenue Code or laws amendatory or supplementary thereto. Principal is exempt from taxation.
^f These issues being investments of various government funds and payable only for the account of such funds have no present tax liability.
In Hands of Foreign Holders. - Applicable only to securities issued prior to March 1, 1941: Bonds, notes, and certificates of indebtedness of the United States, shall, while beneficially owned by a nonresident alien individual, or a foreign corporation, partnership, or association, not engaged in business in the United States, be exempt, both as to principal and interest from any and all taxation now or hereafter imposed by the United States, any State, or any of the possessions of the United States, or by any local taxing authority.

Note.—Figures for 1853 to 1885, inclusive, are taken from "Statement of receipts and expenditures of the Government from 1855 to 1885 and principal of public debt from 1791 to 1885," compiled from the official records of the Register's office. Later figures are on the basis of public debt accounts.

¹Exclusive of the bonds issued to the Pacific railways (provision having been made by law to secure the Treasury against both principal and interest) and the Navy pension fund (which was in no sense a debt, the principal being the property of the United States).

²Includes special notes of the United States, International Bank and Monetary Fund series; United States savings stamps; excess profits tax refund bonds; old

demand notes; United States notes (gold reserve deducted since 1900); postal currency and fractional currency, less the amounts officially estimated to have been destroyed; and also the deposits held by the Treasury for the retirement of Federal Reserve Bank notes, and for national banknotes of national banks failed, in liquidation, and reducing circulation, which prior to 1890 were not included in the published debt statements. Does not include gold, silver, or currency certificates, or Treasury notes of 1890 for redemption of which an exact equivalent of the respective kinds of money or bullion was held in the Treasury.

³Revised in accordance with Bureau of the Census' estimated population for continental United States as of July 1 of each year.

⁴For total gross debt for the years 1791 through 1852 see Secretary's Annual Report for the fiscal year 1949, p. 396.

EXPENDITURES OF GOVERNMENT CORPORATIONS

Table 23.—SUMMARY OF EXPENDITURES OF GOVERNMENT CORPORATIONS—Continued

Note.—Negative figures are printed in italics.

¹ The appropriation accounts from which these expenditures were made were not in all cases established by funds appropriated by the Congress directly to the respective Corporation. They may represent appropriations established by "allocation" or by deposits of other agencies to "working funds" for the Corporations.

² The appropriation accounts from which these expenditures were made were established on the books of Treasury by deposits of corporate funds for administrative expenses; for purchases of supplies, materials, etc.; and, as in the case of the Public Housing Administration, by deposits of receipts which, by authority of law, are appropriated. Negative figures represent excess of deposits (by repay warrant) over expenditures.

³ Expenditures represent net transactions in checking accounts with the Treasurer of the United States. Negative figures indicate that collections from regular operations by such Corporation exceeded expenditures.

Office of the Postmaster General
Washington 25, D. C.

December 18, 1950

The Honorable
John Wesley Snyder
Secretary of the Treasury

Dear Mr. Secretary:

Pursuant to the provisions of the Act of June 9, 1930 (39 U.S.C. 793), embodied in section 18.7, Postal Laws and Regulations of 1948, the amounts set forth below with respect to certain mailings during the fiscal year ended June 30, 1950, as determined under our present system of estimating, are certified to you in order that they may be separately classified on the books of the Treasury Department:

(a) The estimated amount which would have been collected at regular rates of postage on matter mailed during the year by officers of the Government (other than those of the Post Office Department) under the penalty privilege, including registry fees:

Postage.	\$57,339,613	
Registry fees, including surcharges.	23,692,075	
Total		\$81,031,688

(b) The estimated amount which would have been collected at regular rates of postage on matter mailed during the year by:

1. Members of Congress under the franking privilege.	\$1,366,370	
2. By others under the franking privilege	60,368	
Total		1,426,738

(c) The estimated amount which would have been collected during the year at regular rates of postage on publications going free in the county 799,368

(d) The estimated amount which would have been collected at regular rates of postage on matter mailed free to the blind during the year. 120,053

(e) The estimated difference between the postage revenue collected during the year on mailings of newspapers and periodicals published by and in the interests of religious, educational, scientific, philanthropic, agricultural, labor, and fraternal organizations, and that which would have been collected at zone rates of postage 470,087

(f) The estimated excess during the year of the cost of aircraft service over the postage revenues derived from air mail. 36,112,390

Grand Total. \$119,960,324

It has not been the practice to include in item (f) the total cost of handling and transporting air mail. Under the system of estimating used in prior years and followed for 1950 the cost of the items considered amounted to \$137,566,552 for the fiscal year 1950. This estimated amount includes only payments to air carriers (exclusive of \$2,156,962, based on preliminary figures for the fiscal year, paid to air carriers for Star Route Service in Alaska related to other than air mails), personnel costs at air mail fields, and the extra transportation cost involved in getting mail to and from air mail fields. Preliminary figures for the fiscal year 1950 indicate that the total cost of handling and transporting air mail, as determined by Cost Ascertainment procedure, amounted to \$186,288,330. The combined revenue from foreign and domestic air mail was \$101,454,162. This total revenue includes the revenue from both domestic and foreign air parcel post.

Sincerely yours,

Postmaster General
