• WHAT TYPE OF MCOMMERCE ARE CONSUMERS ADAPTING? •

Tremendous growth occurred in the share of people who reported making a POS purchase with their smartphone in the past 24 months

During the second quarter of 2014, it was found that **45%** of smartphone payment users paid for goods and services by presenting a **BARCODE OR QR CODE** on their device screen for cashiers to scan.

37% waved or tapped their mobile phone at the register (**NEAR FIELD COMMUNICATION OR NFC**).

In 2014 alone, **11.1 MILLION** U.S. users accessed near-field-communications or other contactless technology.

Research estimates that in 2016 near-field-communications will be accessed by **36.2 MILLION** U.S. users.

Many retailers have **NFC-BASED**, contactless pay terminals already in place.

Phones compatible with Google Wallet and Apple Pay can currently use these terminals.
