2.0	December 2019	Update original document to include footnotes to Transactions 4 and 10b to document the practice of netting the proceeds for a bidder participating in both the Forward and Reverse Auction process. Also, updated original document to remove SGL 113500 since all Upfront Payments are now recorded in Treasury using SGL 101000 as required by the RAY BAUM'S Act of 2018.	Bulletin No. 2019-14
3.0	July 2021	Update transactions to reflect agreed upon reporting between Federal Communications Commission and the General Fund of the U.S. Government to facilitate proper intragovernmental eliminations.	Bulletin No. 2021-17

## Background

Congress appointed the Federal Communications Commission (FCC or Commission) as the designated federal agency to conduct auctions of spectrum rights for commercial use. This auctions process is commonly known as the Standard Auction. The financial portion of the Standard Auction begins with qualified bidders depositing Upfront Payments into an FCC Treasury account. A deposit liability is recognized for the Upfront Payment maintained in a Deposit Fund with the Treasury Account Symbol (TAS) 027X6725 with internal fund code TDA. All upfront deposits made by bidders with FCC for auctions of spectrum rights shall be deposited with Treasury as required by the Amendment to the Communications Act of 1934 by the Repack Airwaves Yielding Better Access for Users of Modern Services Act of 2018 (RAY BAUM'S Act of 2018). After the auction close, a Public Notice (PN) listing the winning bidders is issued and non-winning bidders are refunded their Upfront Payments. Next, within 45 days of the close of the auctions, the winning bidders' Upfront Payments are moved within TAS 027X6725 from internal fund codes TDA to AUC. The winning bidders will have a specific number of days after auction close (10 to 20 days) to pay any additional downs (difference between the winning bid amount and the Upfront Payment amount) to cover their winning bids. These additional downs made by the winning bidders are deposited directly into the Deposit Fund TAS 027X6725 (internal fund code AUC). In Standard Auctions, earned revenue is not recognized until certain conditions are met by the winning bidders and a "Prepared to Grant" or "Grant" PN is issued by the Commission. Although the majority of the licenses auctioned are granted within one to two years after the auction close, this process may take longer. The FCC transfers a portion of the auction's revenue as approved by Congress to the Salary and Expense (S&E) General Fund TAS 027X0100 (internal fund code X54) from the Deposit Fund TAS 027X6725 (internal fund code AUC) to cover the administrative costs for developing and implementing the competitive auctions program (47 U.S.C. § 309). Depending on the auction or the Public Law mandating the auction, the remaining earned revenue will be transferred to various federal entities as required by the Public Law for specific or general government use. In addition, with approval from the Office of Management and Budget (OMB), FCC retains the approved portion of earned revenue to fund the auctions program in subsequent years when there are no auctions and/or no auctions revenue. This amount is retained in the Deposit Fund TAS 027X6725 (internal fund code AUC) until Congress approves its use through the Commission's budget process.

The Middle Class Tax Relief and Job Creation Act of 2012 (Public Law 112-96) created a new process for redistributing spectrum usage rights by creating the "Incentive Auctions." This new auction process is made up of two types of interdependent auctions: the Forward Auction and the Reverse Auction.

The Forward Auction functions similar to the Standard Auction where qualified parties bid on the spectrum usage rights offered in the Reverse Auction. In order to participate in the Forward Auction, qualified bidders are required to deposit Upfront Payments into a Treasury account Deposit Fund TAS 027X6725 (internal fund code TDA) maintained by the FCC. When the Forward Auction concludes, a PN listing the winning bidders is issued and non-winning bidders are refunded their Upfront Payments. Next, within 45 days of the close of the auction, the winning bidders' Upfront Payments are transferred within TAS 027X6725 from internal fund codes TDA to AUC and categorized as deferred revenue. The winning bidders have a specific number of days after the close of the auction (10 to 20 days) to pay any additional downs (difference between the winning bid amount and the Upfront Payment amount) to cover their winning bids. These additional downs are deposited directly into the TAS 027X6725 (internal fund code AUC). As with the Standard Auction, the earned revenue from the Forward Auction is not recognized until a "Prepared to Grant" or "Grant" PN is issued. **The earned revenue from the Forward Auction is used to pay the following parties: (1) the winning TV Broadcasters from the Reverse Auction; (2) the FCC for the administrative costs of conducting the auctions; (3) to reimburse eligible TV Broadcasters for their costs incurred as a**

**result of their spectrum being relocated and repacked; and (4) the Public Safety Trust Fund, the General Fund of the U.S. Government, or other party directed by the Act or Law.**

The Reverse Auction is the mechanism by which existing television Broadcasters are able to bid on the lowest price that they are willing to accept to relinquish some or all of their spectrum usage rights. The spectrum from the Reverse Auction is what is being repackaged and auctioned off in the Forward Auction. When the Reverse Auction closes it does not trigger any financial transactions. The Reverse Auction winning bidders are paid from the proceeds earned from the Forward Auction. Multiple “Prepared to Grant” or “Grant” PN’s will be issued which list the licenses granted from the Forward Auction. Based on the earned revenue recorded when the licenses are granted, the FCC will issue “Ready to Pay”, PN’s listing the individual Broadcasters to be paid from the Reverse Auction and record a corresponding liability.

The purpose of this accounting scenario is to document the financial transactions recorded in the various FCC TAS’ as FCC’s auctions program process is conducted and completed as well as to illustrate their impact on the financial statements of the Federal Government.

FASAB SFFAS 7: Accounting for Revenue and Other Financing Sources and Concepts for Reconciling Budgetary and Financial Accounting states in paragraph 278 that proceeds from the auction of radio spectrum are exchange revenues. It further states in paragraph 279 that this exchange revenue shall be accounted for as custodial activity. It has been further agreed between the Office of Management and Budget, the Federal Communications Commission, and the Department of Treasury, all auction proceeds shall be held in a deposit fund. Deposit funds generally do not record custodial activity. Sometimes it can take several years for the payment of these funds. It was agreed these collections should have no budgetary effect while they are held by FCC before being paid to the rightful owners.

## **Key Items**

### **1. Reverse Auction Winning Bidders**

- When the Reverse Auction ends, the FCC will not record a financial transaction at the time the “Closing and Channel Reassignment”, PN is issued. This PN lists the winning bidders from the Reverse and Forward Auctions. A liability is not recorded at this time for the Reverse Auction winning bidders, because the FCC is not requesting the Broadcasters to move off their spectrum until the respective licenses are granted in the Forward Auction. Additionally, the funds from the Forward Auctions are not earned and available until the licenses are granted via a “Prepared to Grant” or “Grant” PN.
- The liability to the Reverse Auction Winning Bidders will be recorded in multiple tranches as licenses from the Forward Auction are granted. The “Ready to Pay”, PNs for each tranche will include the amount of the liability to be recognized by the FCC.
- Disbursements to the Reverse Auction Winning Bidders will be paid directly from Deposit Fund TAS 027X6725. There will be no budgetary transactions related to these disbursements since they will be made from the Forward Auction licenses granted.
- The disbursements will be reported on the Statement of Custodial Liability, under the section titled “Disposition of Collections, line 13, Other Payments.”

## 2. TV Broadcaster Relocation Fund

- Transactions in the TV Broadcaster Relocation Fund will be recorded as a reimbursement program and treated as a Dedicated Collection for reporting purposes on the FCC's consolidated financial statements.
- Public Law 112-96 authorizes a maximum of \$1.75 Billion of proceeds from the Forward Auction to be transferred to the TV Broadcaster Relocation Fund to reimburse relocation/repackaging costs of eligible TV Broadcasters that are moved to another frequency. The FCC will initially use its \$1 Billion borrowing authority from the Treasury to begin reimbursing costs incurred by those Broadcasters. Earned revenue from the Forward Auction will be used to repay up to \$1 Billion that was borrowed from the Treasury. An additional \$0.75 Billion from the Forward Auction may be used to reimburse eligible Broadcasters. These amounts are subject to sequestration.
- The initial up to \$1 Billion (less the sequestered amount) obligated will be based on approved estimates of all the relocation costs received from the eligible TV Broadcasters.
- Up to an additional \$0.75 Billion (less any sequestered amount) may be obligated as funds become available from the licenses granted from the Forward Auction.

## Illustrative Transactions

<b>1. Forward/Standard Auctions</b> – To record the Upfront Payments from the qualified bidders participating in the Forward/Standard Auction. In order to participate in the Forward/Standard Auctions, qualified bidders are required to deposit cash, which is known as Upfront Payments, with the FCC. The amount of Upfront Payments is an amount that may not necessarily be equal to the total winning bid amount.

**4. Forward/Standard Auctions (Winning Bidders)** – To record the Additional Downs by the Forward/Standard Auction winners up to their winning bid amount. The Forward/Standard winning bidders have a fixed period (typically 10 to 20 business days) to remit additional funds up to their winning bid amounts. These funds are deposited directly into Deposit Fund TAS 027X6725.

**Note:** In the event that a Forward Auction winning bidder is also a winning bidder of the Reverse Auction, the FCC may net their winning bids together. In the example below the Forward Auction winning bids totaled \$5,000 and the Reverse Auction winning bids totaled \$25. The netting transaction will reduce the Forward Auction winning bid remittance to the FCC resulting in an accounts receivable equal to the Reverse Auction winning bid. In this scenario, when the FCC has funds available to pay the Reverse Auction winning bids (entry #10b), the accounts receivable established in the “netting transaction” below would be satisfied.

**10b. Reverse Auction (Winning Bidders)** – To record payments/disbursements from the Deposit Fund to the reverse auction winning bidders who voluntarily relinquish some or all of their spectrum usage rights. Payment/Disbursements cannot be made until licenses are granted from the Forward Auction and earned revenue is recorded. The FCC may “Hold Back” a portion of the payment to the Broadcaster for various reasons such as other outstanding debt with the FCC. Initially only a net payment will be made to the Broadcaster (200-50=150). In the example below, the Broadcaster owes \$50 in outstanding Miscellaneous Receipts to the FCC. Only \$150 will be paid to the Broadcaster and the remaining \$50 outstanding will be held back by FCC.

**Note:** In the case that a Forward Auction winning bidder is also a winning bidder of a Reverse Auction, the FCC may net their winning bids together reducing their Forward Auction winning bid remittance. In this scenario, when funds are available to pay the Reverse Auction winning bidders, the accounts receivable established in entry #4 “netting transaction” would be satisfied with the Reverse Auction winning bid of \$25 and the transaction illustrated under “netting transaction” below would be recorded.

**10c. Reverse Auction (Winning Bidders)** – If the “Hold Back” is resolved and the Broadcaster no longer has an outstanding debt owed to FCC, then FCC will disburse the remaining 50 to the Broadcaster using Transaction 10b above. However, if the “Hold Back” is not resolved by other means, FCC will then utilize the “Hold Back” of 50 to satisfy outstanding debts owed to FCC by the Broadcaster by posting the following entries. A “no-check” will be processed to reduce the accounts payable in TAS 027X6725 and the funds will be transferred to FCC’s Miscellaneous Receipt Account TAS 0273220 to satisfy the outstanding debt with the FCC. The “no-check” will be completed using an Expenditure Transfer Authorization/Classification Transaction and Accountability (CTA) formerly known as the SF224. **Note:** The “Hold Back” funds could be used to satisfy other debt at the FCC such as Penalties and Regulatory Fees.

**Note:** For purposes of this scenario, TAS 0273220 will only show the receipt of cash from TAS 027X6725 for illustrative purposes only and the effect on the various reporting statements for TAS 0273220 will not be demonstrated.
